

❖ Simulation domain

❖ Voltage waveforms

Case 1. Single frequency (SF)

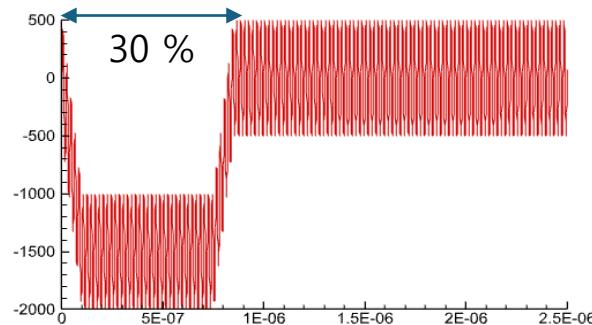

Voltage amplitude (V_{ac})	500 V
Frequency	50 MHz

❖ Specification

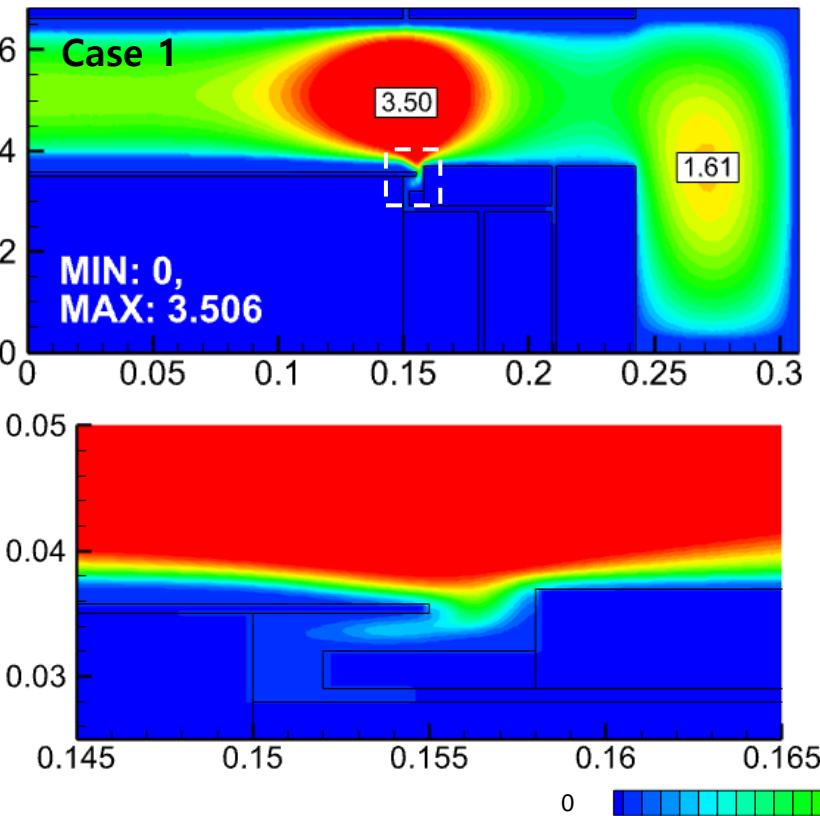

Grid size (Δx)	0.2 mm
Gas type	Argon
Pressure	20 mTorr
dt (Δt)	10 ps
Focus ring	ϵ_r : 10.3 (for Aluminum oxide)

Case 2. Pulsed DC

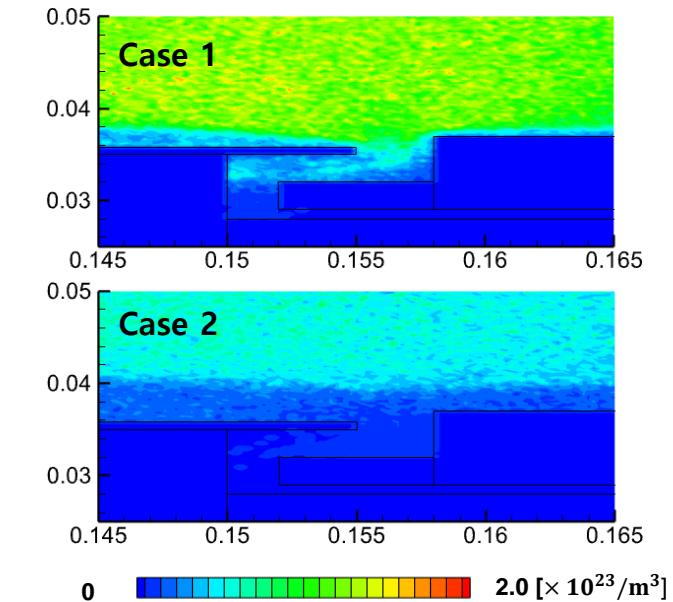

Duty cycle	0.3
High voltage	500 V
Low voltage	-1500 V
Low Frequency	400 kHz
High Frequency	50 MHz

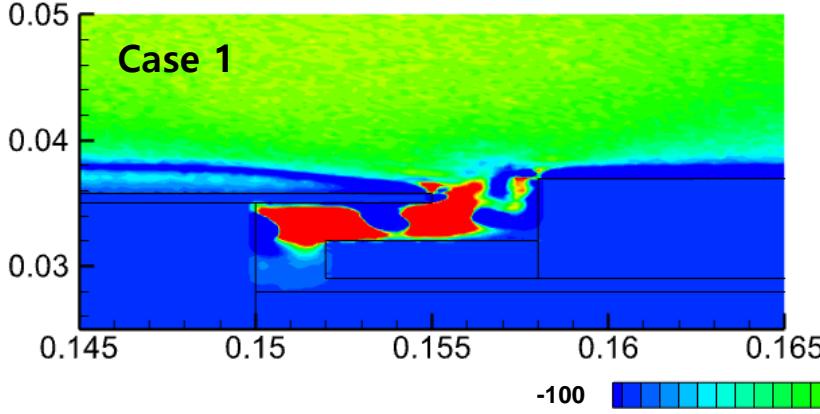

❖ Time-averaged electron density

❖ Time-averaged direct-ionization rate

❖ Time-averaged electron power absorption

❖ Time-averaged space charge density
