Hello Paul,
please try
PP6: Greybox Models for Wear Prediction

Session Chairs:
Philipp Immich, IHI Hauzer Techno Coating B.V., Netherlands, pimnich@hauzer.nl

Ludvik Martinu, Polytechnique Montréal, Canada, lmartinu@polymtl.ca

and make a note it is for the Special Session in memory of Papken Hovsepian. One of the chairs, Philipp Immich, is aware of it.

Best regards
Harry

thanks,
which session should I select?
cheers,
Paul

Dear Paul,
thank you for the quick response and willingness to look into reconsidering your plans. I will recommend your schedule preference to the program chair. It would probably be later in the week, as I can't imagine they would schedule it on Monday.
Perhaps you could send in an abstracts, and if your plans change, it can always be withdrawn.
Kind regards and thank you for the support.
Harry

Dear Harry,

yes, thanks for asking again. Originally I was not planning to go to ICMCTF in 2025, to be honest, but if there would be such an event I reconsider. However, I would prefer to have such a talk later the week, like Thursday or so, which would allow me to come to ICMCTF on Wednesday. I will be at SVC this time, which is just the week after, you know. I don't want to be away from family that long.

many thanks and best wishes,

Paul

Dear Paul,

I have been planning a session in memory of Papken to be held next year, 2025 at the International Conference on Metallurgical Coatings and Thin Films in San Diego. You might remember our conversation about it at the PSE conference. Papken had many links with the community at ICMCTF and I thought it would be appropriate to dedicate some time and look back at some of the scientific advances he might have inspired or developed together and the future outlook. I was wondering if you would be happy to give a talk at such a dedicated session about some of the work relating to nanoscale multilayers he might have inspired and any of the new developments you would like to talk about? Please let me know.

Best regards
Harry
